

MT981

This device is a portable filling level indicator for all (propane/butane - LPG) steel or aluminium gas cylinders with a diameter of 200mm to 350mm. The MT981 can be used to test water in water tanks. It can be used to check whether there is liquid in the cylinder at the test point and determine the filling level.

Features

- Propane/Butane - LPG Gas Level Indicator
- Beep Contact Indicator
- Green LED - Liquid detected at test point
- Red LED - No liquid detected at test point
- Cylinder Type - Steel, Aluminium & Water Tanks

General Specifications

FUNCTION	RANGE
Cylinder Type	Steel, Aluminium & Water Tanks
Cylinder Diameter	200mm to 350mm
Green LED	Liquid detected at test point
Red LED	No Liquid detected at test point
Battery	1 x 9V
Low Battery Indication	Two Status indicator LEDs flashes
Battery Flat Indication	3 Successive beeps & Red LED flashes
Size	146(H) x 46(W) x 30(D)mm
Weight	±99g (including battery)
