

DCB230 230mm Diamond Cutting Blade

Major Tech's 230mm Diamond Cutting Blade, a powerful tool designed for high-performance cutting in challenging conditions. With a maximum speed of 80 meters per second and a maximum RPM of 6600, this cutting blade is ideal for a wide range of applications, including cutting through concrete, stone, hard ceramics, and thin granite. The 230mm diameter and 20mm bore size make this blade versatile and suitable for various cutting tasks. Featuring 18 segments, the diamond-infused design ensures exceptional cutting efficiency and long-lasting durability. Whether you are involved in construction projects or need precision cutting for intricate tasks, this Diamond Cutting Blade is the reliable choice for professionals seeking top-notch performance. Invest in quality and precision with our advanced 230mm Diamond Cutting Blade, offering the perfect balance of power and precision to meet your cutting requirements.
