The Story of Major Tech & VETi

Founded in 1992, Major Tech began with a vision to develop innovative, high-quality electrical test and measurement instruments, a first for South Africa at the time. What started as a specialised instrumentation company quickly grew into one of the electrical industry's most recognised and respected brands, driven by a passion for innovation, quality and service excellence.

Over the past three decades, Major Tech has continuously evolved, expanding from professional test equipment into electrical tools, lighting, smart technologies and complete electrical solutions. Through ongoing investment in research and development, the company has pioneered products tailored to the needs of electricians, contractors and modern homes, while building a reputation for reliability and forward-thinking design.

In 2010, Major Tech introduced VETi, a revolutionary range of switches and power points designed to bring style, modularity and innovation into everyday living and working spaces. Combining modern aesthetics with practical functionality, the VETi range transformed the traditional perception of electrical accessories, offering consumers elegant, customisable solutions backed by patented design and engineering.

Today, Major Tech and VETi products are trusted across residential, commercial and industrial markets, with expanding international reach. From advanced test instruments and thermal imaging technology to smart home automation, decorative lighting and premium switches and power points, the brands continue to push the benchmark for innovation in the electrical industry. Guided by a commitment to quality, technology and customer experience, Major Tech remains focused on shaping the future of electrical solutions for generations to come.

Build your own concept

Major Tech has relaunched the Veti Configurator with the latest technology and is now known as the VETI STUDIO. This new revised VETI STUDIO APP with its sleek new look and feel is available on both IOS and Android devices. The STUDIO is an interactive App that allows architects, engineers, interior designers and homeowners to get more involved in the specification process by choosing their personalised combinations, colours and layouts per room. With Augmented Reality (AR), customers are able to see their finished product in real time.

Once a customer is happy with their design, they will save it to 'My list'. In 'My List', customers are able to see their bill of quantities, product codes and prices. Here customers are able to 'Export' their list, 'Edit' their combinations, 'Add' to the list or 'Delete' the list.

Once exported customers will be able to view the selected list with quantities and prices. This will make it easier to explain to the installer which modules should be used in each assembly and room.

VETI STUDIO APP

Step 1: Download the VetI Studio App

Step 2: Click demo tab and be guided through the process

Step 3: Select Cover, Choose Function & Drag Module

Step 3: In Finishes, Select a Colour Option

Step 5: Select AR, Allow Camera Access & View

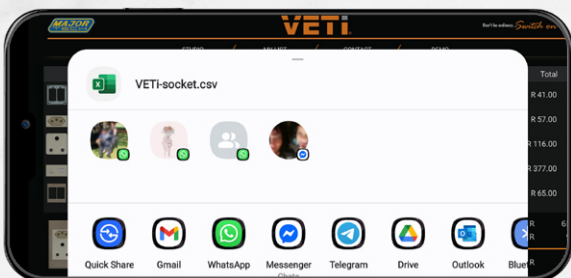

Step 6: Save List and View Bill of Quantities

SKU	Product Name	Unit Price	Quantity	Total
3VM5226	6 Module Fixing Frame (100 x 100mm)	R 41.00	1	R 41.00
3VM208TM	16A V-Slim Socket Module - Titanium	R 57.00	1	R 57.00
3VM201TM	16A RSA Socket Module - Titanium	R 58.00	1	R 116.00
3VM209TM	Type-A USB Socket Module - Titanium	R 377.00	1	R 377.00
3VMP258Z	Six Module Cover Plate - Bronze	R 65.00	1	R 65.00
Subtotal:				R 656.00
VAT:				R 98.40
Grand total:				R 754.40

Colours to Help Switch on Style!

VETI 3 offers a range of matt colour finishes, including White, Titanium, Graphite and Bronze, and has simplified the installation process allowing for easy customisation that can be accomplished quickly and safely. Covers and switches can be swapped out and changed to meet the style and ambiance of any room rapidly, with only a screwdriver in hand. As standard options, Major Tech supplies seven colour combinations being a bronze cover with titanium switch, a titanium cover with graphite switch, a graphite cover with titanium switch, a white cover with white switch, a graphite cover with graphite switch, a titanium cover with titanium switch and a bronze cover with bronze switch.

Perfectly Flat in the Off Position

The Vetii 3 range from Major Tech boasts an ultra-slim design that delivers a modern, stylish aesthetic, perfectly suited for contemporary interiors. Its large switch covers ensure easy switching, while the toggle action provides a unique functional edge—flat when off and slightly ajar when on. Major Tech's full range of VETI switches and GPO has been tested and approved to all required AS/NZS standards and has been afforded all required SAA certificates, ensuring both quality and compliance.
